INDEX OF SUBJECTS

- Adductor pollicis tension**, the "boomerang" - a method of recording (Walts), 706
- Adult respiratory distress syndrome (ARDS)**
positive end-expiratory pressure (PEEP) therapy, evaluation of (King, Jones & Patakas), 546
- Althesin**
a new intravenous anaesthetic (Swedlow), 186
effects of hypoxaemia on cerebral blood flow and cerebrospinal pressure in dogs anaesthetized with (Cohen), 757
effect on central nervous system (Kavan, Julien & Elliott), 528
effect on cerebral blood flow and intracranial pressure (Cohen), 754
- Amphibia**, anaesthesia for, 702
- Anaesthesia**
and the liver: history and epidemiology (Dykes), 34
awareness during (Browne & Catton), 763
blood serum levels with enflurane (Ethrane) and isoflurane (Forane), during and following major abdominal surgery (Dobkin et al), 494
cardiovascular and respiratory responses to severe hypoxaemia under anaesthesia (Gray et al), 637
chloroform, first fatal case in Canada (Matsuki & Zsigmond), 395
effects of, on the immune response, 112
epidural; complications, 687; technique, 689; in a community hospital (Adamson), 687
for bronchoscopy, comparison of venturi and side-arm ventilation in (Carden et al), 569
for laboratory animals (Holland), 693
for major hepatic resection in infants and children, 424
for microsurgery of the larynx, a new method (Carden & Crutchfield), 378
for pelvic laparoscopy (Calverley & Jenkins), 679
for simultaneous bilateral nephrectomy (Jenkins, Moloney & Cyr), 259; complications, 268; conduct, 264; maintenance, 265
for thymectomy in children with myasthenia gravis (Davies & Steward), 253
for transurethral prostatic resection, 277
general: effect on surface tension of secretions in upper airway in patients with and without pulmonary disease (Stanley & Zikria), 290; for endolaryngeal surgery, technique of ventilation (Spoerel & Greenway), 369
in chronic uraemia and anaemia, relation of exchange of respiratory gases to (Ramachandran & Cole), 736
management: of anephric patients and patients in renal failure (Estafanous), 769; of patients with cardiac valve prosthesis, 211
post anaesthetic jaundice due to glucose-6-phosphate dehydrogenase deficiency (Shapley & Wilson), 390
respiratory volume pressure relationships during (Waltemath, Bergman & Preuss), 281
serum magnesium concentrations during anaesthesia and cardiopulmonary bypass (Calverley et al), 499
spinal, serum magnesium determinations during, 505
spontaneous and controlled ventilation during methoxyflurane (Gray et al), 637
water nebulization in a non-rebreathing system during (Tayyab, Ambiaavagar & Chalon), 728
with halogenated vapours, effect of premedication on duration (Kim & Dobkin), 479
with a non-rebreathing system, evolution of heat and moisture in the respiratory tract during (Déry), 296
- Anaesthetic gases**
ventilation with a mixture with water vapour at body temperature, water balance of respiratory tract during (Déry), 719
ventilation with, humidified by a cold water nebulizer (Tayyab, Ambiaavagar & Chalon), 728
- Anaesthetic system**
flow requirements for a modified Mapleson D system during controlled ventilation (Bain & Spoerel), 629
Neff circulator device for circulating gases (Jones & Prosser), 659
non-rebreathing; evaluation of heat and moisture in respiratory tract during anaesthesia with (Déry), 296; water nebulization in, during anaesthesia (Tayyab, Ambiaavagar & Chalon), 728

- Anaesthetics:** see also names of specific agents
 action on leukocytes, acute and chronic (Bruce), 55
 agents as causative toxic factor, 3
 biotransformation of volatile, role in development of toxicity, 26
 chronic exposure; a toxicity problem (Jenkins), 104; methods of reducing, 114
 general, during stress of hypoxia compared with enflurane and isoflurane (Dobkin, Byles & Levy), 782
 halogenated, cytotoxic effects on cultured human liver and embryonic kidney cells (Corsen), 48
 hypersensitivity, 109
 intravenous, althesin, a new agent (Swerdlow), 186
 local: acute and chronic toxicity (Fink), 5; metabolism, 9; pharmacokinetic considerations, 5; protective drugs against toxicity, 8; toxic effects on human respiratory epithelium (Corssen), 17
 operative deaths associated with, in Alberta, 1952-1972 (McIntyre), 578
 records, decimal classification for a filing system (Brunelle), 398
 renal toxicity of, with special reference to methoxyflurane (Mazze & Cousins), 64
 sympathomimetic (Chen), 180; (Zsigmond, Letter to Editor), 592
 toxicity: (Jenkins), 2; acute and chronic (Symposium), 2-120; definition, 2; studies comparing isoflurane, halothane, fluroxene and diethyl-ether (Stevens, Joas & White), 357
 volatile: biotransformation of, with special emphasis on role of metabolism in toxicity (VanDyke), 21; effect on bacterial growth (Mehta, Behr & Kenyon), 230
- Aneurysms, intracranial, anaesthesia for with hypotension and spontaneous respiration** (Sellery, Aitken & Drake), 468
- Animals, laboratory, anaesthesia for** (Holland), 693
- Anoxaemia**
 cardiovascular and respiratory response to severe, under anaesthesia (Gray et al), 637
 effect on cerebral blood flow and cerebrospinal fluid pressure in dogs under anaesthesia with althesin, pentobarbitone and methoxyflurane (Cohen et al), 757
 exchange of respiratory gases in relation to anaesthesia in cases of chronic uraemia and anaemia (Ramachandran & Cole), 736
